

JUNIOR TEXTILE ENGINEER (M/F)

At Antelope we believe that the sky's the limit. We believe that every day you can take the first step towards improving yourself and to go beyond your limit. Embrace new challenges. Today is your day to become a part of something great, to join our community and to become a member of the ANTELOPE.CLUB.

Our goal is to enable our users to unleash their full physical potential. We have developed a range of innovative sports clothing containing a technology called electro muscle stimulation (EMS). EMS activates our users' muscles whilst they exercise beyond the level that can be achieved with conventional training. Most EMS products are suitable only for use in special gyms. Our products are fully mobile, enabling our users to train with EMS anytime, anywhere. Unique.

Currently, we are working on the positioning of our brand and the further development of the industrial production as well as the international roll out. We are therefore looking for a motivated Junior Textile Engineer (m/f) at the earliest date possible.

This is your chance to combine your passion for sport and lifestyle with your job. By introducing your ideas on a diverse range of tasks you will be able to support the development of our company. We believe that fun at work, flat hierarchies, hands-on-mentality, flexible working hours and places are key conditions for a committed and motivated team.

Do you think you're the right fit for this job and are excited about going beyond your limits? Then apply at ANTELOPE by sending us your application. We look forward to meeting you! We look forward to meeting you at our office in Frankfurt/Germany at the earliest date possible!

Please send your application to **Barbara Toolin (bt@antelope.club)**.

YOUR RESPONSIBILITIES AS A NEW MEMBER OF OUR TEAM WILL BE:

- Cutting and sizing new, original designs for our products.
- Developing our next generation textiles.
- Actively researching new trends in materials.
- Extensive material testing (e.g. washing, wearing, using)
- Liaising with suppliers to provide feedback on trials and developments throughout the design and production process.
- Working proactively with all members of our design, buying and production teams, supporting and developing business relationships to ensure successful results at all levels of the product journey.
- Performing product testing to ensure product quality (UV protection, antibacterial, etc).

POSITION REQUIREMENTS:

- Degree in Textile Engineering, Materials Science or similar qualification.
- Practical experience as a Textile Engineer in a commercial setting is an advantage.
- A passionate, industrious and dedicated outlook to meet the complexity of this role.
- Profound German language skills or willingness to learn.
- Good English language skills (company's working language).
- Excellent communication skills with the ability to work closely with all members of the design team and with other relevant departments.
- A flexible and practical approach to task management with an ability to work under pressure and within time constraints.
- Ability to work independently and think outside the box.
