

REGISTRATION FORM

5th Japanese-German Micro/Nano Business Forum 2012 Exhibition Micromachine/MEMS 2012 ■ JULY 12, 2012

In July 2012 IVAM organizes the Japanese-German Micro/Nano Business Forum at the Exhibition Micromachine/MEMS in Tokyo.

The Business Forum that takes place for the fifth time in a row offers an excellent opportunity to establish contacts to Japanese industries.

With 350 Japanese industry representatives the event in 2011 was quite successful. The specialist presentations at the forum give an excellent overview of the current research and industry activity in Japan and Germany. The printed version of the presentations will be united in conference proceedings that are provided free of charge to the visitors of the Forum. Thus a broad audience will be reached and further contacts and cooperation initiated.

You already have the possibility to submit your presentation now. It should last ca 20 minutes and be held in English or Japanese. The speaker's fee of 980,00 Euros (plus VAT of 19%) already includes the costs of simultaneous interpretation in English and Japanese as well as the following services:

1. Program entry (online and print)
2. Inclusion in the conference proceedings
3. Beverages and snacks during breaks

Comments on the last event

I am glad that Japanese-German Micro/Nano Business Forum 2011 was so very successful again. This year's forum was, also thanks to the new IVAM manager Heinz-Peter Hippler, arranged very lively and interesting. I think that the well-functioning cooperation between IVAM and the Micromachine Center will be very important for the prospective development of nanotechnology in Japan as well as abroad.

Keiichi Aoyagi, Executive Director, Micromachine Center

The organization, the technical equipment and the location of the forum were excellent. Especially the cooperation with the translators ran smoothly. The choice of lectures was diverse and thus covered a wide field. I recommend the participation in the forum, it provides the possibility to present technologies to an international audience.

Dr. Steffen Sinning, Fraunhofer Institute for Photonic Microsystems

The 5th Japanese-German Micro/Nano Business Forum takes place within the scope of the Exhibition Micromachine/MEMS 2012.

Exhibition Micromachine/MEMS 2011

Date: July 11-13, 2012

Place: Tokyo Big Sight

Sponsor: Micromachine Center (MMC)

Organizer: Mesago Messe Frankfurt Corporation

The Exhibition Micromachine/MEMS is the world's largest trade fair with the topic of Micro/MEMS and Nanotechnology and takes place this year for the 23rd time in Tokyo.

Thanks to its numerous accompanying events like symposia or seminars the trade fair attracts a big number of international visitors from the micro and nano field each year. According to the data of the event organizer Mesago Messe Frankfurt, last year's fair was a great success with its 12.000 visitors.

The accompanying event of the fair is ROBOTECH - as a trade fair on production technology for service robots. IVAM has reserved exhibition area at the Micromachine/MEMS 2012 for IVAM members and participants of the 5th Japanese-German Micro/Nano Business Forum.
